CSC111 Winter 2024 Project 2

Kai Lo, Chong Wan, Aaina Garg

March 23, 2024

TODO List

- Find more data about districts of Zurich

  - Current data set only has the district IDs. We would like to have names, and locations
  - With locations of each district, we could potentially use a Google Maps API to check the distance between two districts

- UI interface: should have two parts, one for district recommendation and one for dog breed recommendation

  - ???

- Add graph implementation

  - We want to use weighted graphs to indicate similarity between dog owners and such.

- ???
